

STONE TAPESTRY: BEYOND THE SURFACE

Grove Whitbed®

- **Location:** Mined on the Isle of Portland, Dorset
- **Colour:** Typical Portland colour - creamy/white mellowing to grey/white over time
- **Petrological Family:** Oolitic Limestone, predominantly grey shells with some large white shell fragments. The shells are mainly large thin clams laid parallel to the bedding
- **Uses:** It is suitable for most aspects of construction including load-bearing masonry, external paving, internal flooring and cladding projects. With extensive reserves readily available, Grove Whitbed® is an ideal choice for both new build and conservation projects.
