

STONE TAPESTRY: BEYOND THE SURFACE

Portland Stonehills Whitbed

- **Location:** Mined on the Isle of Portland, Dorset
- **Colour:** Typical Portland colour - creamy/white mellowing to grey/white over time
- **Petrological Family:** Oolitic Limestone, mostly a tight uniform matrix with some evidence of openness and voids associated with light shell banding.
- **Uses:** It is suitable for most aspects of construction including load-bearing masonry, external paving, internal flooring and cladding projects. With extensive reserves readily available, Portland Stonehills Whitbed is an ideal choice for both new build and conservation projects.
